

THE AMBLE
ESTATE

Solar power at The Amble Estate

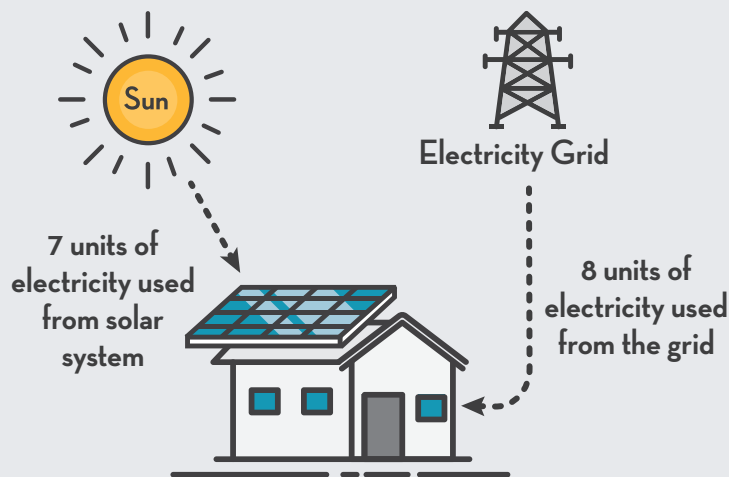

Sustainable and affordable living is made even easier at The Amble Estate, with a solar power system offered with every home built, as part of the complimentary Sustainable Living Package*.

This means you can save money on your electricity costs and help the environment by reducing the need to burn carbon emitting fossil fuels such as coal and gas.

How does it work?

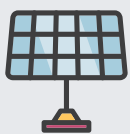

Infinite Energy will install a rooftop solar system at your home free of charge. You will then only pay for the net solar electricity that you consume. Infinite Energy will own the solar system and be responsible for ensuring it is working properly for the term of the agreement.

Every two months Infinite Energy will invoice you for your daily generated solar electricity. Your invoice from Infinite Energy will show your net 40% discount off daytime solar energy*. Synergy will issue a separate invoice for the grid electricity you consumed (night consumption and any additional day consumption) plus a credit for any exported energy.

Home consumes a total of 15 units of electricity over 24 hours (both day and night)

Billing

Infinite Energy
(Solar Provider)

The customer is billed for:
7 units of consumed solar electricity at the same rate as the Synergy A1 tariff less the net 40% discount

Synergy
(Grid Retailer)

The customer is billed for:
8 units of solar electricity at the Synergy A1 tariff

How solar energy will benefit you:

- ✓ Free installation and setup of solar system
- ✓ 40% net discount off your daytime solar energy*

Solar Power initiative a first in WA

The Amble Estate is the first in Western Australia to provide a net 40% discount off your daytime solar energy. This initiative will provide homeowners with significant ongoing savings to the cost of power*. Now you can be part of a forward thinking and sustainable community at The Amble Estate.

*Terms and conditions: The solar power system is only available to buyers who build a home at The Amble Estate and is provided as part of the Sustainable Living Package incentive. The buyer will enter into a 10 year solar power purchase agreement (PPA) direct with Infinite Energy, in which Infinite Energy retains full ownership and maintenance responsibilities for the solar system for the term of the PPA. The homeowner will have access to discounted daytime solar power, which is generated from their solar power system installed on their home, at a discounted rate of net 40% less than the Synergy A1 grid tariff when they pay their bill in full by the due date. Any power consumed from the South West Interconnected System main Synergy electricity grid will be charged at the A1 grid tariff rate. At the end of the 10 year contract term, either the solar system will be removed by Infinite Energy upon request by the homeowner or the solar system ownership will be transferred to the homeowner for as little as \$1.00 and the homeowner will then have full maintenance responsibilities. The project partners reserve the right to review and revise any solar power rebates or offerings, in line with any Federal Government changes to legislation and incentives.
